25X1

An immense aluminum works is located in Kamensk, about 120 kms SE of Sverdlovsk. In the last years it has been greatly enlarged and is still being enlarged. In the spring of 1948, approximately 70,000 (sic) men worked here in three shifts. Aluminum was produced and sent to the adjoining rolling mills, where it was ~~manufactured~~ processed from ingots into sheets, rods, and wires of every strength and dimension. Since 1947, aluminum sheets, destined for the airplane factory near Sverdlovsk, have been the main product. German PWs work with Russian civilians in the factory. Among the free workers there are thousands of deportees who were banished from European Russia for political reasons for 3, 5, or 10 years.

GAZI ZHENINE Refinery:

Central Intelligence Agency

In 1944 the refinery was renamed NAFTO PEREGONY ZAVOD #3. The factory, employing 350 workers, is located at 207 Sholkievskaya Ul. It received raw oil from the Drohobycz oil fields and processed 240 hecto litres of raw oil per minute. Two railroad trains, each consisting of 50 railroad tank cars with a holding capacity of 50 tons, serviced the factory, shuttling between the factory and the oil fields on an average of once a day in one direction.

25X1

[REDACTED] the factory was not equipped to handle this quantity, and consequently the machinery started to show signs of deterioration. Water is furnished this plant through an underground pipeline of approximately 60 cm. in diameter which originates in Samastinov, 2 1/2 Km. from the factory. All pumps in the factory were steam operated. The manager of the factory, Dimitri Nikolaevich TRUBECZNI, is an UZBEK; his deputy is GLOCHOV (fnu). According to source the largest refinery in Polish Ukraine is "POLMIN" in Drohobycz, and the second largest is the KARPATIA.
